My dear Birdie -

If it is not too late please accept my thanks for the loan of your daughters over sunday. I had been thinking of them a great deal and wishing I could see them and especially on saturday but nevertheless was surprised to see them come around the corner of the house. I was getting supper and had come out to chat with Mr S. & was sitting on kitchen steps. My but I was pleased to see them. They are both so sweet and lovely. I wish I could see Ga too but you will bring her now to see her Auntie Ga soon I hope (when her little new "cousin" arrives.) I wanted to write a note monday a.m. but Grs. started earlier than I expected.

Mrs Talley (My nurse) came out sat. to rest a while and is a jewel - She just takes so much off my hands & mind. Yesterday she made 14 glasses of grape jelly (lovely) and 4 pts spiced apples and is now in kitchen making larger amt. of grape jelly. Monday she pickled 1 pt of those figs & preserved 1 pt. I wanted to put them up for winter instead of using now. I have put up 17 pts to melons and will put up a few more - also canned some apples & Kelseys and now I am ready to rest on my ones as far as fruit is concerned. You see I have to think of three lunches now for almost a year and we will have good deal of company etc and I do not want to feel that I must scrimp when so much is due to be taken care of. Helen is in a great way about starting to High school and expects to go next week - will board at home. Will mean quite a little extra work for me but she is not much

"Good morning Carrie"! Well we had a very heavy fog last night - very thing wet this morning - does not look much like a picnic in the alfalfa but I guess we will have our "picnic" just the same - to day or tomorrow I baked cake last night while getting supper and stewed apples for pies and boiled eggs this morning while getting breakfast and got potatoes ready for salad - etc.

We carried 3 glasses grape jelly out to tank house yesterday - Looks like a lot but will soon disappear.

Now, my dear, I totaled the bills of things you sent me but do not know how much some things

wire – the wall – paper + water pitcher – Let me know so I can settle soon –

Post – sub. has come –

Hope to see you soon –

Love. Ga.

real help to me when she is home and a great deal of worry because of always being away some place. We hope she will do good at school and try to be something or have some ambition besides toys + dresses. We are willing to sacrifice for her if she will do her part + try to study etc.
Glad to get that "thing" you sent in Geo's suit-case. Did not intend to buy one but it will probably come in handy. Do it yours' Wish you could see my room before it is soiled or upset. Mrs F. is sweeping it just now. It is so clean + sweet looking. I am feeling o.k. when I am not too tired - Have been trying to rest a little each day for last week and now that fruit + jelly is all disposed of can rest more. Have to do a little fixing to Helen's clothes to get her ready and Lala will have to sew for her for awhile. "Always something to do" but if I am strong as I hope to be I'll come thro the winter nicely - Oh. I did not thank you for the beautiful cucumbers. They touched the spot! Have been trying to get more but guess they are scarce as hen's teeth. To-morrow we are planning for a picnic dinner under the walnut tree's on the alfalfa. Wish you could join us. It is to be a surprise for Mr F. I am so glad to have him home for a few days. His first day home he carried my chair, rug + pillow out in shade where he was working then brought papers pitcher of lemonade etc. out and I rested nearly all p.m. It is such a help to me too and I would not work so hard if he could be here more. Had such a nice letter from cousin Ella - congratulations - Glad you told her. My uncle is delighted - said he'd start a bank account of $25.00 for the name - No. So much to say but guess I'd better stop now and visit the kitchen. Let me hear + come over when you can - May have a chance to add a few lines before I send this. Lots of love. Ga
